

Robotic Inspection for Corrosion Under Insulation (CUI)

Field tested. Industry validated.

Built for CUI. Unlike anything else.

- Accurate data to reveal critical damage
- Full 360° inspection — no scaffolding, no insulation removal
- Inspects vertical or horizontal piping, insulated or bare
- Crawls over shoes, around hangers, across beams

Efficiency, delivered.

- Full-service inspections by ARIX technicians
- High-resolution data from video and NDT payloads
- Turnkey execution — robots and experts included

Speed, cost, and access—all redefined.

15x faster
inspections

70% budget
savings

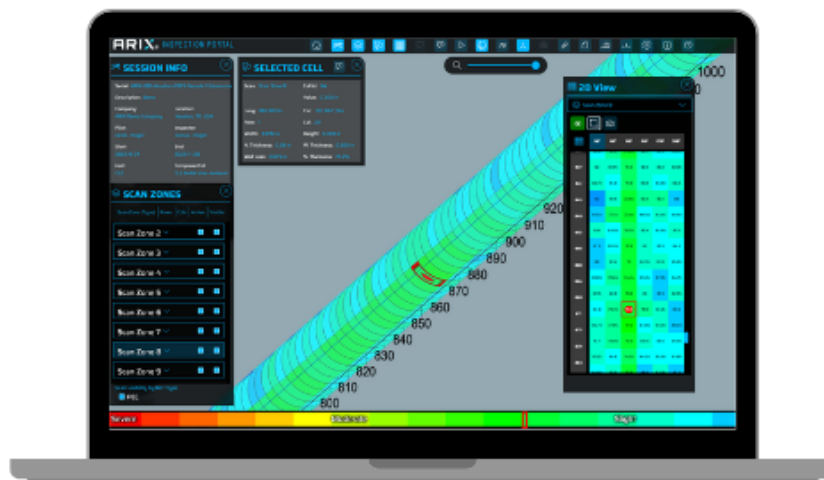

99% less
scaffolding

Leverage the full potential of your inspection data.

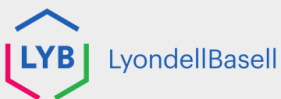

Reporting That Drives Action.

- 3D data visualization and video playback
- Automated reports, ready to review and share
- Decision-ready intelligence for asset owners

Measurable Impacts

- 89% Cost Reduction
- 2,600' of 360° scans
- 100 days of scaffolding avoided

- 70% Cost Reduction
- 325' of 360° scans
- 25 days of scaffolding avoided

- 37% Cost Reduction
- 6,500' of 360° scans
- 240 days of scaffolding avoided

“Game-changing in the refining industry...”
